

# TARKIO 6-12 AMI PLAN

## ALTERNATE METHODS OF INSTRUCTION

AMI day is used to improve learning during a school day that has been canceled due to inclement weather or closure for an extended amount of time. An AMI day means that students will complete learning activities and assignments provided by the teacher at home. Students will receive learning activities and assignments for each subject that would have originally taken place during a regular school day.

### AMI Plan (one day) (inclement weather)

1. Need to have emergency plans in place ready at any time relevant to content teaching at that time.
2. The school will attempt to give students advanced warning to take their school devices home when winter weather is forecasted.
3. Teachers are not expected to go to school on an AMI day but are expected to push out assignments by 8:30 am via Google Classroom.
4. Teachers will check email throughout the day for student help.
5. Teachers have the option to provide Google Meet sessions for students during the typical school day hours. No more than 20 minutes.
6. Students are expected to complete all assigned work given on this day via Google Classroom upon return to school the next day.
7. Student's attendance will be given based on completion of the assigned work on the day following AMI.
8. Assignments during AMI days are meant to review previously taught concepts.
9. Any student unable to access the internet on an AMI day will have 24 hours upon returning to school to complete the work assigned.
10. Text will go out to parents stating school is not in session and students will complete AMI plan.
